"Grand Design or Blind Chance?"

**Dave and Mary Jo Nutting** are the Founders and Directors of Alpha Omega Institute. They were college math and science instructors when they first grappled with the problems of evolution and became convinced of the evidence for Creation. Their personal contact with students convinced them of the importance of the issue, not only in science, but in evangelism and Christian growth. Since founding AOI in 1984, they have spoken extensively, giving presentations for churches, universities, camps and tours both in the USA and internationally. Their presentations with hundreds of high-quality PowerPoint images have been noted for being enjoyable and easily understood for a wide variety of ages.

**Bill Hoesch** teaches origins and science at Southern California Seminary in San Diego and is also a scientist with Logos Research Associates. He received a Bachelor's degree in geology from the University of Colorado at Boulder and a Master's degree from the Institute for Research Graduate School. He was formerly employed in petroleum exploration both in the Rocky Mountain region and offshore West Africa. For one year he taught English, geology, and some creation science to faculty and students at a leading petroleum university in the People's Republic of China. Following this he worked for 18 years at the Institute for Creation Research, where he participated in the 8-year RATE project and in several long-standing field geology research projects. He has deep convictions on creation science and delights in making the abstruse understandable to lay people.

**Tim Dane** is the Senior Pastor of Mesa Hills Bible Church and President of Front Range Bible Institute. He holds an M.Div. and Th.M. from The Master's Seminary and a Ph.D. from Baptist Bible Seminary. He and his wife Karen have six children and two grandchildren and moved to Colorado nine years ago after having ministered for 14 years in Southern California.
